

JOJO JOSE

Tappan, New York | jojojose2003@gmail.com | 551-216-8611 | U.S. Citizen

PROFILE

Versatile Computer Science graduate and Cybersecurity candidate seeking entry-level opportunities in Software Development, Data Analysis, or IT Support. Proven track record in Python/R automation, SQL database management, and technical troubleshooting. Expert at streamlining data workflows, ensuring data quality, and communicating complex technical findings to cross-functional stakeholders.

EDUCATION

University of West Florida, Pensacola, FL

Expected 2028

M.S. Cybersecurity

St. Thomas Aquinas College, Sparkill, NY

May 2025

B.S. Computer Science, Minor: Data Science | GPA: 3.9

EXPERIENCE

RHIME STAC, Sparkill, NY

Sept 2023 – May 2024

Peer Mentor

- Developed and optimized R scripts to automate the cleaning, validation, and integration of large datasets, ensuring 100% analysis-ready outputs and improving system reliability.
- Visualized trend analyses and mentored peers on debugging and data standards, translating complex technical findings into actionable reports for non-technical leadership.

Veolia, West Nyack, NY

Jun 2023 – Aug 2023

GIS Intern

- Leveraged Python and enterprise GIS tools to standardize asset records, improving data traceability and integrity across critical infrastructure systems.
- Automated data retrieval from AWS S3 using Python, identifying and flagging system inconsistencies to facilitate rapid root-cause investigations.
- Reconciled high-volume mismatched records by validating identifiers, resulting in a cleansed, high-fidelity dataset for executive-level reporting.

Orange & Rockland, Pearl River, NY

Aug 2022 – Aug 2022

Computer Aide Intern

- Transformed raw operational records into standardized, analysis-ready datasets using Python, increasing efficiency for downstream trend analysis.
- Executed complex SQL queries (MySQL/PostgreSQL) to troubleshoot data anomalies and enforce quality control protocols for sensitive technical data.
- Summarized complex findings and data limitations for leadership, translating technical results into clear takeaways to guide next steps.

PROJECTS

Down the Memory Lane - Digital Memorial Website

May 2025 – Present

- Engineered a full-stack Next.js app with Supabase and Stripe; designed schemas and implemented auth/payments.

STAC CyberRunner

May 2025 – April 2026

- Re-engineered AI robotics in ROS 2, building perception/state-estimation/control modules autonomously.

Redistricting and Gerrymandering Analysis

Sept 2022 – Aug 2023

- Performed geospatial data analysis using Python to visualize redistricting proposals, presenting technical insights to professional mathematicians at the MAA meeting.

Covid-19 Dashboard

Feb 2022 – May 2022

- Built an interactive R-based dashboard to visualize and track localized health trends, utilizing data cleaning techniques to ensure reporting accuracy.

HONORS/AWARDS

Aquinas Leaders Program; Academic Scholarship Award Recipient; Dean's List (STAC)

COMPUTER SKILLS

Skills: Python, R, Next.js, ROS 2, Git, APIs, AWS S3, SQL (MySQL, PostgreSQL), Supabase, Data Visualization, Data Cleaning, Data Quality, Automation, Technical Troubleshooting, Problem Solving, Technical Communication, Microsoft Word, Microsoft Excel
